	Description
Deposit: Compaction, colour, composition, particle size, inclusions, thickness and extent, comments, method & conditions	E-W pit, length: 1.45 m, pres. max width: 0.55 m height: 30.30 m (probably > 0.65 m) steep vertical sides with flat base the cut was not visible at the pres. upper edge of (1001), but certain elements were noted by the initial excavation of (1001) in the area of the pit [1002]. Therefore it is likely that the upper edge of the pit was immediately below the topsoil (1000). the cut was well visible in the section between A1 / A2 pit fill = (1003) and human primary interment (1006)
Cut: Shape in plan, corners, dimensions/ depth, break of slope at top, sides, break of slope at base, base, orientation, inclination of axis, truncated (if known), fill #'s, comments	
Layers: Compaction, colour, composition, particle size, inclusions, thickness and extent, comments, method and conditions	
Walls: Shape in plan, dimensions, orientation, construction method, construction material further description
